

Risk Assessment Seminar

WHY ARE WE PROVIDING THIS?

These kinds of tools were often only available south of the border at seminars where participants were asked to pay nearly their full training budget.

In our capacity as professionals actively involved in furthering the security craft, we felt an obligation to share these tools in a cost-effective manner to the community's inner circle.

For the cost of producing the materials and with the assistance of the Carleton Place Public Library, we are able to share this for the cost of \$187.00 per person.

We wish to thank our colleagues at the Carleton Place Library whose dedication to education and the community to allowed us obtain this brightly lit and fully equipped classroom with free parking only 30 minutes west of the downtown core at a cost that makes this seminar possible.

Many highly skilled security practitioners find it challenging to find risk assessment tools and methodologies that are appropriate to the task at hand.

This seminar explores four key methodologies, their tools and applications.

At the end of the one-day session, you will leave with a comprehensive manual detailing these four key methodologies, an electronic copy of the software applications and a full day's exposure to the practical use of these methodologies that can be applied in public sector, private industry or military settings.

Space is limited so reserve now. To reserve seats, contact us at:

info@evolutionarysecurity.ca

Location: 101 Beckwith Street, Carleton Place

Time: 20 March 2010 (0930 to 1700)

Reservations are on a first come, first served basis.
